

Multi-purpose freestanding sign holder

Our new freestanding sign holder can be used for multiple electoral purposes: at the count (for indicating ward) or at the polling station where noticeboards are not available (e.g. for generic signage such as 'Polling Station Entrance', signage to request voters have their ID ready, or for displaying polling station notices).

Multi-purpose freestanding sign holder:

- Is suitable for multiple electoral purposes
- Offers multiple height settings (3)
- Offers multiple choices for customisation

Suitable for internal use, this sign holder is robust, long-life and portable. It has three easily adjustable options for height settings (1,280mm (below eye level), 1,720mm (head height) and 2,150mm (overhead hanging height)) which renders it ideal for a number of electoral signage purposes, has a sturdy base, and is supplied with a hanging board manufactured from a HIPs plastic material. The hanging board itself is available in oversized A3 format and can be supplied plain (to allow multiple use options using our associated accessories) or pre-printed to order (price on application and subject to quantity).

Shaw's are also able to supply bespoke boards to fit other manufacturers' signposts. Please contact us to discuss any bespoke requirements.
